

PATIENT NAME: ANDERSON,TAMARA

UNIT NO: AS00617251

EXAMS:

001837680 XR KNEE LT AP LAT OBL 3 VW

LEFT KNEE RADIOGRAPHS

VIEWS: THREE

EXAM DATE AND TIME: 2/5/2024 8:32 MST

INDICATION: MVC.

COMPARISON: None.

FINDINGS:

Metallic splint is in place. Osseous mineralization and alignment are normal. Postsurgical changes status post ACL reconstruction. No acute fractures. Periarticular osteophytes involving the medial joint compartment. Subtle calcifications are seen in the anterior joint space possibly representing intra-articular loose bodies. The patella and patellar extensor mechanism is intact. Suprapatellar effusion.

IMPRESSION:

1. Negative for acute bony abnormality.
2. Degenerative changes of the renal joint compartment with possible intra-articular loose bodies.
