SYNERGY CHIROPRACTIC CLINICS

8515 Pearl Street, Suite 100 Thornton, CO, 80229 Ph: 303-630-0400

DOCTOR'S NOTES

Patient: Angel, Theodore (Jimmy) Visit #: 9

DATE: 2023-06-09

SUBJECTIVE:

- 1. Headaches (0/10) none lately
- 2. Neck pain (0/10)
- 3. Upper back pain (0/10)
- 4. Mid back pain (0/10) stiffness
- 5. Low back pain (5/10) on R
- 6. SI/gluteus pain (5/10) on R; still up to 7/10 with driving/sitting long times
- 7. Shooting pain down right leg to calf and on occasion to foot, continues and can be intense
- 8. Left shoulder pain, had initially but better lately
- 9. Dizziness/light headed

Sleep – wakes about 3-5x/night due to pain

ADL's – increase in pain with some household duties and movement activities.

Work – Plummer. He is working normal hours and duties but with more pain.

OBJECTIVE: Muscle Spasms rated as follows: (+1 = mild; +2 = mild-moderate; +3 moderate; +4 severe); (TrP's = trigger points)

cervical paraspinals +1

upper trapezius +1

levator scapulae +1

medial scapular +1

thoracic paraspinals +2

lumbar paraspinals +2

QL's +2, R>L

Gluteus +1 on R

Tender to palpation of R>L PSIS

Joint restrictions in cervical, thoracic, and lumbar spine.

Thoracic MRI taken 4-28-23 had the following impression per report:

Unremarkable thoracic spine MRI

Cervical MRI taken 4-7-23 had the following impression per report:

Motion degraded exam limited evaluation of cervical cord signal.

Mild annular bulging C4-5, C5-6 and C6-7. No high-grade central canal stenosis or foraminal narrowing identified given motion limitation.

Lumbar MRI taken 4-7-23 had the following impression per report:

- 1. Transitional lumbosacral anatomy with current nomenclature assuming a transitional S1 segment.
- 2. Multilevel lumbar spondylosis, appearing most significant at L5-S1, where there is a right greater than left L5-S1 neutral foraminal narrowing and right subarticular recess stenosis secondary to a right central disc extrusion.
- 3. Mild bilateral foraminal narrowing at L4-L5 and mild right foraminal narrowing at L3-L4.

ASSESSMENT:

Headache: acute, not intractable G44.319

Cervical sprain S13.4XXA

Cervical strain S16.1XXA

Thoracic sprain S23.3XXA

Thoracic strain S29.012A

Lumbar sprain S33.5XXA

Lumbar strain S39.012A

SI joint sprain \$33.6XXA

SI joint strain S39.013A

Myalgia M79.1

Muscle spasm of back M62.830

Injury of unspecified nerve at abs/low back/pelvis S34.9XXA

Dizziness R42

Segmental Dysfunction – Cervical M99.01

Segmental Dysfunction – Thoracic M99.02

Segmental Dysfunction – Lumbar M99.03

Segmental Dysfunction – Sacrum M99.04

Segmental Dysfunction – Pelvis M99.05

PLAN: Conservative treatment 1x/week due to his work schedule (12-24 visits; 2x/week for 4-8 weeks then 1x/week for 4-8 weeks) in conjunction with recommendations per medical doctor

TREATMENT TODAY: He does not like the hydrotherapy table.

Manual spinal manipulation: thoracic, lumbar, SI spine

Interferential current 1 unit: lumbar paraspinals

Hot packs: lower thoracic, lumbar

Intersegmental traction: thoracic, lumbar
